TRUST YOUR

FAMILY

TO OURS

The choice is clear.

ALLSCO

Quality Products Built for Atlantic Canada.

ALLSCO windows and doors have been in the homes of Atlantic Canadians for over 45 years. Having started as a family business in 1976, one of ALLSCO's fundamental values is to produce quality products that ensure your comfort and reflect your personal style. With almost half a century of experience under our belts, we know what it takes to manufacture windows and doors that look great and stand up to the harshest of climates.

OUR SOCIAL

AND ENVIRONMENTAL

ENGAGEMENT

As a leader in the Canadian Window and Door industry we believe that it is important to not only produce products that meet our strict industry standards for performance and energy efficiency, but to also ensure we are protecting our environment for the generations to follow.

When you purchase an ALLSCO product you can be assured we are taking our environmental responsibilities seriously! We recycle all residual glass and vinyl extrusion used in the manufacturing process.

This material is then used in the manufacturing of other goods that are sold throughout North America. In addition to this, we have made efforts to reduce our print material by offering scan code technology and printing our brochures on environmentally friendly paper.

COMMUNITY

With our roots in Atlantic Canada we understand the importance of friends, family and community. We are proud to be involved with local groups and organizations throughout the Atlantic region either directly or through supporting our numerous dealers and retail outlets.

Prince Edward Island National Park

Fundy Coastal Drive in New Brunswick

Peggy's Cove Lighthouse in Nova Scotia

OUR PRODUCTS

ARE TESTED TO MEET

INDUSTRY STANDARDS

ENERGY STAR®

We are proud to produce Energy Star® qualified windows and doors. Look for the Energy Star® logo which represents high efficiency windows and doors that help to reduce your home energy costs by 7 to 12 percent, collect less condensation and reduce noise from outside.

NAFS AND NFRC

In 2014, a new standard was adopted by the National Building Code of Canada, called the North American Fenestration Standard (NAFS). Our windows are tested according to National Fenestration Rating Council.

(NFRC) standards by Keystone Certifications Inc., an NFRC licensed inspection agency (IA). The NFRC is a non-profit organization that establishes nationally recognized, objective window, door and skylight energy performance ratings to help you compare products and make informed purchase decisions.

CHOOSING THE RIGHT WINDOW

PVC

Unlike other materials, PVC is virtually maintenance-free. It requires no painting and is energy-efficient, sealing your home against any kind of weather. PVC windows are a great value option for your home and allow for a multitude of design possibilities.

HYBRID

Hybrid Windows are proudly manufactured by our sister company Laflamme. This Hybrid Aluminum-PVC window pairs an exterior frame made of extruded aluminum with an interior frame made of rigid PVC. This innovative product assures you the strength and beauty of aluminum combined with the energy efficiency of PVC.

Hybrid windows are an ideal solution for coloured window applications with an unlimited selection of colours on an extruded aluminum exterior.

WHY CHOOSE

A PVC WINDOW?

PVC is the most popular resistant material on the market for doors and windows! It is easy to maintain and offers excellent energy efficiency.

4700 PREMIUM - CASEMENT | 4800 PREMIUM - AWNING

PVC Casement & Awning

Casement and awning windows are contemporary in design, offering maximum ventilation and superior performance ratings.

Casement available as a 2700 Vintage Series insert frame or 8700 Prestige Series. Awning available as a 2800 Vintage Series insert frame or 8800 Prestige Series.

+ Design Options
Page 28

STANDARD FEATURES:

- Standard LoE glass
- Argon gas-filled thermopane
- Warm-Edge Super-Spacer®
- Triple weather-stripping for maximum air tightness
- Roto® folding handle **1**
- Multipoint locking system for added security **2**
- Interior bug screen for easy removal **3**
- Available in triple-pane **4**
- Integrated designer brickmould
- 3 1/4" multi-chambered PVC frame
- Larger units feature steel reinforcement
- Dual 1/2" and 3/4" integrated return
- Structural assembly to ensure window solidity
- Exterior brickmould can be closed or open with a J return

TRIPLE-PANE OPTION

Comprised of 3 layers of glass, triple pane units reduce noise and offer higher performance ratings up to an insulating value of 6.7*.

OUR PARTNERS

MOST ADVANCED RESIDENTIAL GLASS PRODUCTS IN THE INDUSTRY

Low Emissivity, or LoE, glass helps keep homes warmer in winter and cooler in the summer by increasing energy efficiency and reducing the transfer of heat or cold through the glass.

LoE-180™

When the weather turns frigid, Cardinal LoE-180™ glass is the perfect cold remedy. It keeps homes warmer and more comfortable by blocking heat loss to the outside and letting the sun's heat stream in. Cardinal LoE-180™ glass is designed for our Canadian climate; it offers the highest energy rating performance versus other glass manufacturers.

LoE-272™

Cardinal LoE-272™ glass delivers year-round comfort in all types of weather. In summer, it rejects the sun's heat and damaging UV rays. In winter, it reflects heat back into the room.

LoE-366™

Cardinal LoE-366™ glass is the ultimate performance glass, delivering the ideal balance of solar control and high visibility. It provides the highest levels of year-round comfort and energy savings.

LoE-i89™

Introducing LoE-i89™, Cardinal new energy-saving 4th surface coated glass. Rather than absorbing internal heat, LoE-i89™ reflects it back into the room, making your living space feel warmer and more comfortable.

ALLSCO works with several industry leading suppliers to ensure that your windows and doors are fitted with quality components that help to add value to your home. Working together to bring you the best quality!

INNOVATIVE, INDIVIDUAL AND SECURE HARDWARE SYSTEMS

Roto® solutions combine intelligent security, energy management and comfort in buildings, and in so doing create genuine “inner values” for all concerned. ALLSCO windows and doors come standard with Roto® hardware, and include such noteworthy elements as:

X-DRIVE FOLDING CASEMENT HARDWARE

Recognized for reliability, this European-engineered hardware is an up-charge for many window manufacturers but is included on every ALLSCO window. We use Roto® X-Drive hardware exclusively with standard folding crank on our casement products. For added style, we offer an array of designer finish choices.

CORNER DRIVE FOR PVC CASEMENT WINDOWS

The Roto® Corner Drive is a modular system designed to offer added security and performance to casement windows.

STAINLESS STEEL HINGES

Heavy-duty Roto® stainless steel hardware is available on all casement products meaning you can feel confident that rusted hinges are no longer an issue. Our stainless steel operator provides over 2000 hours of corrosion protection, well exceeding the AAMA 907 standard.

AUTO-LOCK SYSTEM

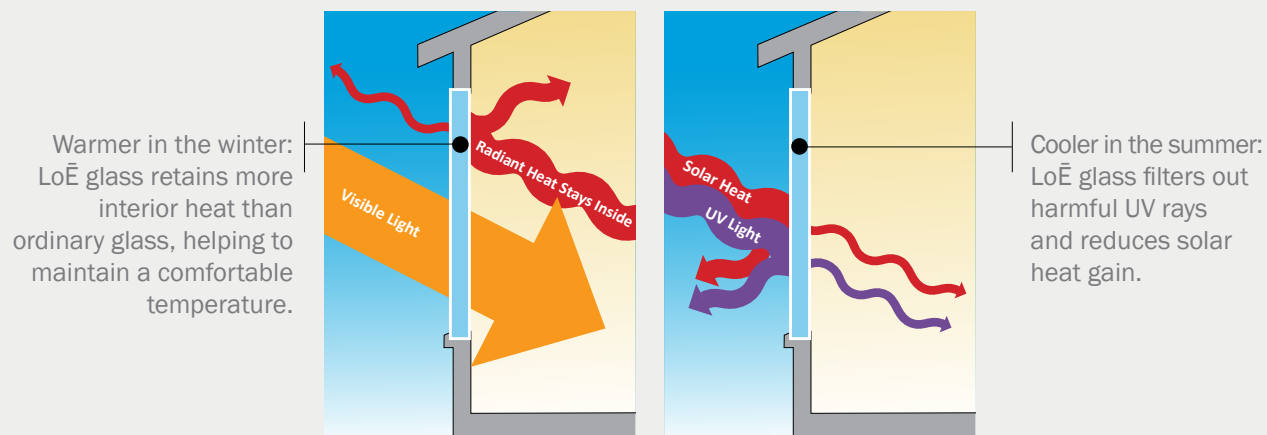

This system is available on single hung and side-slider windows. The system features a positive action lock; once unlocked and the window sash is opened, the lock resets itself and locks automatically when the sash is closed. The auto-lock system is easy to operate and offers peace of mind, allowing you to rest assured that once your window is closed, it's locked.

LoE COATED GLASS

Although windows provide beautiful views and wonderful natural light, they can also be responsible for the majority of the annual heating costs for a home, through heat loss. It is important that new windows effectively retain heat inside, while keeping extreme hot and cold weather outside. Think of LoE coating as invisible insulation that helps to provide a shield:

- In the winter, LoE coated glass helps keep your home warm and cozy by blocking heat loss through windows while allowing the sun's heat inside.
- In the warmer weather, LoE coating blocks the sun's harmful UV rays, protecting the interior of your home and keeping your furniture from fading. At the same time allowing in more visible sunlight.

LoE coated glass is simply the best way to help minimize energy costs and maintain comfortable temperatures inside your home all year round. At ALLSCO we are proud to offer Cardinal LoE-180™ glass which offers the highest energy rating performance on the market.

SEE THE DIFFERENCE OUR LoE MAKES

Compared to glass used by other manufacturers, our LoE glass provides enhanced visibility for a clearer view every time you look outside your windows.

Competitor Glass

ALLSCO'S LoE-180™ Glass

Competitor Glass

ARGON GAS

Argon is a clear, non-toxic gas used to fill the space between the window panes. Heavier than air, Argon offers greater resistance to heat loss and reduces exterior noise. Our Energy-Plus combination of LoE Coated Glass, Argon Gas and the Warm-Edge Super-Spacer® is engineered to double the insulating ability of the space between the panes.

WARM-EDGE SUPER-SPACER®

To keep window condensation moisture off the glass, windows need to have the warmest possible temperature at the edges of the glass. Super Spacer® effectively blocks the heat escape path for premium energy efficiency while eliminating condensation, which can lead to harmful mold growth around your windows.

Full Metal Spacer

OUR

WARRANTY

ALLSCO's history is deep rooted in family values and the dedication to providing our customers with the highest quality and most energy efficient products possible. We focus our attention on ensuring that our clients' needs are met, and that the products we provide are engineered to withstand the harshness of our Canadian climate. Our experience in the industry gives us the vision to be able to provide you with the most durable products that ensure your comfort and reflect your personal style.

ALLSCO partners with several industry leading suppliers, such as Cardinal Glass and ROTO hardware, to ensure that your windows and doors are fitted with high quality components that help to add value to your home, and create peace of mind knowing you are being provided only the best from ALLSCO.

OUR

COMMITMENT

We stand behind the quality of our products, so much so that we offer a lifetime warranty on our window's vinyl, hardware and sealed glass units.

Our Dura-Plus door frame is also covered under a lifetime warranty. Factory painted windows and doors are covered for 10 years on the paint.

ALLSCO is continually innovating and testing our products to guarantee that we meet all Canadian certification standards (including NAFS and EnergyStar).

Please note the warranty information listed is relative to our current products. For detailed information on your specific product warranty, please contact ALLSCO's Service/Warranty department at 506-853-8888.

Proudly serving Atlantic Canadians for over **45 years**

ALLSCO products are sold through a network of professionals who can help you analyze your window and door needs and suggest the most appropriate product. ALLSCO and its dealer network are dedicated to providing you with the best in energy efficient products. Invest in windows and doors that will last the life of your home. Window and Door systems from ALLSCO.
